Multiple logistic regression is one of the most common multivariate techniques to be used in medical research. Yet, few researchers know how to use multiple logistic regression effectively. This course aims to educate participants in the correct use of multiple logistic regression using the SPSS software.

Outline of lecture
- Categorical data analysis
- Multiple Logistic Regression

Faculty
Professor Dr Awang Bulgiba Awang Mahmud (MBBS, MPH, MAppStats, PhD) has been working in the University of Malaya for the last 10 years. Before joining academia, he worked in the Ministry of Health, with his last position being in the Institute for Public Health. Prof Awang teaches mainly medical statistics, health informatics and research methodology to both undergraduates and postgraduates.

Who should attend?
- Clinicians, pharmacists, public health physicians, and researchers from public institutions and private institutions.
- Participants are expected to have a basic understanding of statistics and the odds ratio.

Registration Fees
Students RM250.00
